

“Math has been my passion since elementary school, closely followed by electronics and software. I am excited to help children develop their curiosity and critical thinking skills by sharing some of my passion with them. KidSTREAM will be a much needed platform allowing me to share my experience and excitement.”

**David Barker, Director  
Volunteer, Electrical Engineer**

- Master of Science in electrical engineering, Purdue University
- Hardware and software engineer for over 40 years
- Skills in process automation, system administration, web applications and hardware development
- Served on other nonprofit boards for over 20 years in various roles, including president

David is retired and currently volunteers for Channel Islands Maritime Museum. He is very community oriented and has spent many hours volunteering with local community nonprofits. David's level of excitement towards learning is infectious and his passion to share his knowledge with others makes him a great addition to our board.
